The article is a very short summary of piezo main domains of use. It would be useful to add, for each type of use, some working related with the maneuvers.

It would also be useful to detail the antimicrobial effect in infected sites, like the use of piezosurgery during the bone resection in MRONJ—double positive effect—antimicrobial and bone-preservative. I suggest the authors to concentrate on the positive effects, citing some articles related to the antimicrobial effect in the general context of minimising the use of antibiotics.
