**Potential competing interests:** No potential competing interests to declare.

**Article Subject:** "Feature Selection and Classification of Type II Diabetes on High Dimensional Dataset"

This work shows promise but requires modifications to meet publication standards in this journal. The following revisions are recommended to enhance its quality:

1. **Title:** The title needs to be rewritten to be more attractive.
2. **Proofreading by a Native Speaker:** This manuscript needs to be revised by a native speaker to enhance its readability and comprehensibility.
3. **Abstract and Introduction:** The abstract and introduction need to be revised to provide a comprehensive overview of the research. They should include a clear problem statement, highlight the research gap, and provide a detailed description of our proposed system along with its main contributions.
4. **Explanation of General Figures:** It needs to add more detailed explanations and be clear to the general reader, providing a step-by-step explanation of each process.
5. **Figure 3** needs to be clearer.
6. **Updated References:** The references need to be updated to include more modern sources.
7. Also, need to make a comparison of our proposed system with the most relevant modern works in the field.

**I recommend accepting this paper, contingent upon the suggested modifications.**
