Potential competing interests: No potential competing interests to declare.

1. **Figure 3 – Label:** The label should be written like this: "Figure (3)" like in the other figures and not "Figure 3)".
2. **Table (2):** The text and equations inside this table should be better placed because some of the text and some parts of the equations cannot be read. They cannot be read because they are very low inside the cells or upon some text, etc. The authors should correct these matters concerning this table.
3. **Results:** It is better for the authors to use numbering for the different results, so that it becomes easier for the reader to understand the different results.
