First and foremost, we would like to sincerely appreciate the authors for their efforts in enhancing the quality of the content.

Upon reviewing the updated version, we've noted that there are still a few comments that have not yet been addressed. It's important to consider these comments as they contribute to the overall quality and accuracy of the content.

To enhance the manuscript further, we recommend adding more details about the aim of the study, and highlighting key points to give a comprehensive overview of the manuscript, and replacing current images and charts with higher quality visuals to better illustrate the findings and enhance reader comprehension.

Once again, thank you for your commitment to refining this important work. We look forward to your continued collaboration and the further development of this research.

Best regards,
