Potential competing interests: No potential competing interests to declare.

1. Introduction— Expand a little more to highlight the research problem and to highlight the study's need.
2. Methodology
  - Expand a little more on the research design that will be used in more detail.
  - Provide a detailed explanation of the steps in the research study that will be used.
3. Contribution: It would be a good paper if it did look at the research impact on the community.
4. Findings: Should align with the study goal.
5. Add to recommendations for researchers
