The author was very ambitious in the goals presented in the abstract of the article.

However, after pondering on the article, the study claims to investigate the relation between poverty and crime in Pakistan and establish a robust economic and social framework while implementing transparent policies for equitable resource allocation. Bearing these goals in mind, this is my criticism:

\*The draft of 3 pages needs to be elaborated and cannot represent a comprehensive article or paper;

\*The article has no section dedicated to the literature review;

\*The analyses and discourse on the core point of discussion is not elaborated;

\*The conclusion of the work did not present the core points of discussion.

I suggest that a comprehensive study needs to be carried out that

investigates the relation between poverty and crime in Pakistan and establishes a robust economic and social framework while implementing transparent policies for equitable resource allocation.
