Potential competing interests: No potential competing interests to declare.

The review is thorough, but there are a few recent studies on cinnamon as anticancer published in the last two years that should be included to make it more comprehensive. The use of silver-, chitosan-, silica-, and D,L-lactide-co-glycolide nanoparticles should be included.

AP-1 (section 3.2) should be named in full for the first time it is mentioned in the text.

This paper has the potential to make a valuable contribution to the field. Addressing the comments above will help improve its clarity, depth, and overall quality of the review paper.
