

Review of: "Evaluation of Ambient Air Quality Levels at Various Locations within Lead City University, Ibadan"

Bárbara A. Macías-Hernández

Potential competing interests: No potential competing interests to declare.

The document requires major revisions, as well as giving more details of the sampling, including a list with the number assigned to each space. The units of CO are in ppm and mass/volume. In a paragraph of section 4, in a single paragraph, it has CO₂, and then you talk about CO. Which one is correct? Check units. There are no conclusions.
