In the abstract, to use the abbreviation, the full name of the term must be given first, and the abbreviation must be used in parentheses.

What is the range of the quality of life score? Is this score good or bad?

In the results section, “ anemia and marriage were the most predictors in all scales.” In all scales or all dimensions???

Introduction:

Colorectal cancer (CRC) or colorectal cancer (CCR) ???

Once an abbreviation is used, you should not use the full term again in subsequent sentences. For example, colorectal cancer (CCR) in line 8, colorectal cancer in line 11.

In paragraph 2, to use the abbreviation, the full name of the term must be given first, and the abbreviation must be used in parentheses. QoL

The reason and importance of doing this study is not well presented.

Methods:

Ethical consideration is repeated twice in the method section.

Results:

Table 2 is not correct.

In table 3, The results of the linear regression analysis of the possible predicting factors of QoL or global of GI cancer survivors???

The title of tables 3 and 4
