

Review of: "Outcomes of Rezum Water Vapor Therapy for Benign Prostate Obstruction with One-Year Follow-Up: Largest Real-World Data from Türkiye"

Morteza Fallah-Karkan

Potential competing interests: No potential competing interests to declare.

Level of Originality, Writing Style, and Clarity are good in this article. The following are my observations and suggestions:

The manuscript needs professional proofreading or at least must be seen by a native speaker.

1. The Keywords should be checked in the Mesh database.
2. The keywords should be sorted alphabetically.
3. The background section has unnecessary sentences that every reader is familiar with, and it is better to be replaced with other content.
4. Please summarize the introduction section of the manuscript.
5. Complications should be detailed according to the Dindo-Clavien system.
6. All outcomes, exposures, predictors, potential confounding factors, and effect modifiers are not given.
7. I would include a demographic table to better visualize the patients. I would also consider listing Ethnicity, Smoking Status, and Comorbidities if available, since those are associated with increased/decreased incidence of management failure.
