Title of the manuscript: Review of: Refrigerant Selection in Air Conditioning Systems Considering Thermodynamic, Environmental, and Economic Performance Using the BHARAT-II Multi-Attribute Decision-Making Method

1. The authors should identify the aims of the study in the abstract
2. The finding/s of the study should be included in the abstract
3. The authors should insert subheadings such as: Literature review, Methodology, discussion
4. Equations should be numbered and appropriate fonts, i.e., reduced fonts.
5. Titles of the Table of Contents must be on the same page as the Table
6. Are the authors discussing refrigerants for residential as well as industrial refrigeration and air conditioning applications, and motor vehicles?
7. What are the main questions addressed by the research?
8. What parts do you consider original or relevant for the field?
9. What specific gaps in the field does the paper address?
10. What does it add to the subject area compared with other published material?
11. What are the main questions posed? Were they addressed?
12. Remove the bullets in the references section.
13. Attend to the English language.
14. Appropriate formatting is required.

THANK YOU
