

Review of: "Groundwater Potential Zone Assessment Using Remote Sensing, Geographical Information System (GIS), and Analytical Hierarchy Process (AHP) Techniques in Fogera Woreda, South Gondar Zone, Ethiopia"

Farooq Ahmad Dar

Potential competing interests: No potential competing interests to declare.

The paper has been improved a little bit but not to my expectations. I checked my suggestions and questions, which I raised for improving the manuscript, and I found most of them have not been attended to with good enthusiasm. However, a few changes have been made which have increased the quality. I suggest the paper may be accepted only after all the suggestions from the other reviewers are incorporated.
