

Nutrition and Growth

Mehdi Abbasi

Source

Mehdi Abbasi. (2014). *Neurofibromas Or Any Other Tumors The 2014 NF-Conference*

According to the general law of nutrition and growth, Nutrition could be divided into two categories: 1) healthy nutrition and 2) unhealthy nutrition. Healthy nutrition and sufficient nutrients cause natural and healthy growth while unhealthy nutrition and gluttony cause unnatural and unhealthy growth.

THE HYPOTHESIS TO FIGHT CANCER BY STARVATION
Nooshin Abbasi & Mehdi Abbasi
University of Padova – Italy, Department of Biomedicine – Molecular Medicine

Introduction
"The only secret of nature is its understandability."
and so
"The imagination is more important than science."
– Albert Einstein

One of the most general laws governing the development of nature, society and thought, is ...

Material
This is the problem! ... a homemade enemy that is very clever, cunning and dangerous, whose ultimate goal is cellular genocide.

Method
The curing is possible if cancerous cells are cut off from red marrow's cells (neutrophils & macrophages) Of course, this is an effective and intelligent method, but ...

Result
... a healthy nutrition causes natural and healthy growth.

Conclusion
We believe that the key of the problem ought to search in the blood of patient.

Thanks to University of Padova, Department of Biomedicine – Molecular Medicine and specially Prof. Andrea Tesei
