**Potential competing interests:** No potential competing interests to declare.

## Overall Improvements Needed

- **Philosophico-Theological Quality:** Improve the depth and scope of the discussion.
- **Conciseness:** Make the article more concise and focused.
- **Aim Clarification:** If the goal is to show compatibility between Islamic theology and quantum theory, ensure this is clearly defined and distinct from broader monotheistic theology.
- **Addressing Quantum Indeterminism:** Engage with arguments supporting the prevailing interpretation of quantum theory, which suggests ontological indeterminism.
