

Review of: "Optimized Low-powered Wide Area Network within Internet of Things"

Muhammad Zulkifl Hasan¹

¹ University of Central Punjab

Potential competing interests: No potential competing interests to declare.

While most of the comments have been responded to by the authors, additional points not specific to methodology could be raised for a more meaningful and useful discussion on what has been examined and analyzed in reality. Changes have been incorporated.

Can be forwarded for publication if APC has been processed.
