Potential competing interests: No potential competing interests to declare.

Here are my comments and suggestions:

1. The research motivation and contributions should be extended.
2. There are many studies in modern business education. What is the novelty in this study?
3. The authors should extend the methodology. It is too short. Add some references here.
4. Some background regarding the methodology could improve the quality of the article.
5. What is the impact of this study? A discussion is required after the experimental results.
6. The literature review is weak. The author can cite some recent works in optimization algorithms like:
 - a) <https://doi.org/10.1016/j.ins.2021.02.024>
 - b) <https://doi.org/10.1016/j.eswa.2021.115637>
 - c) <https://doi.org/10.1016/j.knosys.2021.107432>
 - d) <https://doi.org/10.1016/j.compind.2019.06.004>
 - e) <https://doi.org/10.1016/j.advengsoft.2022.103370>
