Potential competing interests: No potential competing interests to declare.

Very interesting topic, where currently the music and song industry is developing very rapidly. Software systems compete with each other to quickly identify the genre tendencies of music listeners. Here are some suggestions :

1. Abstracts improved, more clearly and contain introduction, method, results, discussion, and conclusion.
2. Add limitations of this study, the problems faced in this research.
3. More addition of references in discussion parts for comparison and analysis with other methods.
