Potential competing interests: No potential competing interests to declare.

The manuscript entitled "Nanomaterials: History, Production, Properties, Applications, and Toxicities" has to be revised before publication.

Some major changes need to be addressed.

1. The statement of purpose for writing this paper is not mentioned.
2. A proper introduction is missing from the paper.
3. It is much more like a book chapter than a manuscript.
4. Application of NMs is not included.
5. More figures have to be included in the paper for better understanding.
6. Try to use recent references in the paper. All the references are very old.

Major changes are needed before publication.
