

Review of: "Exploring Clinicians' Experiences of Accessing Drug-Resistant Tuberculosis Drug Susceptibility Testing Services from Health Centers in Blantyre"

Vimal Kumar

Potential competing interests: No potential competing interests to declare.

The authors tried their best, but I have some simple suggestions/comments.

- (1) The findings are not of national or international importance. They might be significant at local levels to correct the administration.
- (2) The sample size is very small.
- (3) It is not clear whether written ethical clearance has been obtained or not.
- (4) The article is not suitable to be published in an international journal.
