Electronic mode of delivery

Behaviour Change Intervention Ontology (BCIO)

Source

[Behaviour Change Intervention Ontology \(BCIO\)](#)

Definition: Informational mode of delivery that involves electronic technology in the presentation of information to an intervention recipient.

Curator note: Electronic has been used rather than digital because not all of the content may involve digital encoding - some may be analogue. Also, it is the electronic nature that is central not the means of encoding.

This definition was imported from the Behaviour Change Intervention Ontology (see <https://bciovocab.org/>). Comments and suggestions for improvements are welcome using the Qeios review system.

Definitions imported from the Behaviour Change Intervention Ontology (BCIO) are what are known as 'ontological definitions'. See this article in Qeios for an explanation <https://www.qeios.com/read/YGIF9B>.

Ontological definitions can sometimes be hard to read. In those cases we also include an informal definition.

Definitions also often require elaboration to make it clear how they should be used and what they include. In those cases we include a comment.

Also, definitions sometimes require an explanation as to how they came about to help users understand how they relate to alternative definitions. In those cases we include a curator note.
