

Review of: "Evaluation of Ambient Air Quality Level at Various Locations within Lead City University, Ibadan"

Anum Iqbal¹

¹ Government College University Lahore

Potential competing interests: No potential competing interests to declare.

abstract need to be revise. a lot of grammar and punctuation errors

the units of CO₂ and CO should be same

introduction is too long

can be shorten by moving details of each parameter in discussing

objectives should be incorporated at the end paragraph of introduction and not to be written separately in bullets

no need for research questions to be stated.

a novelty statement should also be included in the last paragraph of introduction

limitation statement of study in repetitive in 2 or 3 places

the study area should include the total population of university campus, including number of day scholars and residents.

total area covered by university, including its coordinates and , type of surrounding area

clearly Define the total number of sampling areas

define the timeline of sampling

in Data Collection, mention the name of the standard which were followed for sampling

mention the name and model of sampling equipment

remove unnecessary information, (i.e how each parameter were measured)

Combine the results presented in table 2 - 16 in one table and mention units of each parameters

combine table 17 and 18

mention X and Y axis in both figures

Conclusion is missing
