Potential competing interests: No potential competing interests to declare.

1. The abstract is well-written and comprehensive.
2. In the introduction, the anti-diabetic effects are emphasized more than the anti-cancer effects, which leads to a deviation from the main discussion.
3. The purpose of the study should be stated at the end of the introduction.
4. Overall, the article is well-written and complete, but it lacks figures and tables.
5. It is recommended to create a table summarizing data from previous studies and, figures, can enhance the article's appeal.
