Potential competing interests: No potential competing interests to declare.

1. In page 2, line 10, can the authors further discuss comparative effectiveness?
2. In page 3, lines 4-5, the statement " The MICP method boosts soil strength and erosion resistance while being more eco-friendly than conventional cement stabilization. It's less energy-demanding and may help sequester CO₂" — is there a reference?
3. In page 6, line 3, the statement "Table 2 synthesizes findings from previous reports and literature" — what are those reports and literatures?
4. Are there any quantified data for the descriptions listed in Table 2?
5. Any references for the information in Table 1?
