

Review of: "Effects of Cinnamon on Cancer Prevention and Progression"

Nidhi Gupta

Potential competing interests: No potential competing interests to declare.

The article is an excellent effort to give insights on the beneficial aspects of cinnamon. But I would like to ask the authors to thoroughly go through the manuscript to avoid grammatical errors such as the merging of sentences. This can give more clarity to readers.

Another suggestion is the incorporation of figures for each of the possible factor pathways so that the role of signaling molecules, along with the bioactive compounds of cinnamon, can be properly understood.
