Potential competing interests: No potential competing interests to declare.

1. Abstract is very lengthy and vague. No need for background information in the abstract.
2. Avoid abbreviated terms in the keywords list and section heads.
3. Introduction section needs to be shortened.
4. Section 3, NMs and their applications, should be explained with pictures and images for better understanding.
5. Section 5 also needs to be explained elaborately.
6. Summarize the findings before the conclusion.
7. Scope for further study to be included.
