Authors have presented a detailed view in the article "[A Comprehensive Overview on Pharmacological and Therapeutic Insights of *Solanum nigrum* Linn](#)" which is significant and novel in light of available literature. However, the following comments must be incorporated for further improvement of the manuscript:

1. Abstract must highlight the novelty clearly and increase the word count to give a better idea about the article.
2. Introduction must show the gap which has been addressed.
3. Some minor language errors and style should be modified.
4. All previous references beyond the last 10 years are to be removed and replaced with recent references from the most recent decade (remove all references before 2014 and replace them with new ones).
5. The articles must be updated with the references:
