

Review of: "Haematological and Biochemical Patterns in the Liver Function of a Syrup Made From *Vitex Doniana* Fruit"

Madhu Chakkere Shivamadhu

Potential competing interests: No potential competing interests to declare.

ABSTRACT

- The abstract should be rewritten for better understanding of the readers.
- 25-45 mg/kg or ml? Should be clarified.
- Use appropriate words like mice, not mice's.

Results:

- Values of antioxidant enzymes were mentioned in uM/g. Enzyme activity should be defined/expressed in Units. These units were not consistent throughout the manuscript.
- The author claims *Vitex Doniana* fruit extract improves liver function. Does the author use a negative control or a positive control to prove their hypothesis?

Lack of explanation in the introduction section.

Reference

Authors should follow journal format for the references, especially with DOI, PMID numbers, and some references cited directly from websites should not be acceptable.

Lot of grammatical errors and verbatim were found throughout the manuscript.

Overall, the manuscript was poorly written and should be rejected.
