

Review of: "Recycling of Waste Bamboo (*Bambusa vulgaris*) into Value-Added Platform Chemicals: Bioethanol and Bioethylene"

Prof.Naveen Singhal¹

¹ DIT University

Potential competing interests: I have read this paper completely and recommend for rejection There is no scientific method declared in the paper that is clear about the work plan in the research. Proper indexing was not done in the bibliography.

I have read this paper completely and recommend it for rejection.

There is no scientific method declared in the paper that is clear about the work plan in the research. Proper indexing was not done in the bibliography. There are a few other points which are clear about the rejection -

1. The initial stage of bamboo material dissolution is not clear in the manuscript.
2. No proper scientific method was adopted.
3. This is totally a literature work.
4. The reactions of different stages were not clear in the above process.
5. I strongly recommend rejecting this paper for publication.
