1. Can you provide clarity on the dataset used and its Description, which is missing in this paper.

2. Can you provide feature extraction and selection w.r.t. the dataset considered.

3. Can you explain the experimental results in terms of confusion matrix, precision, recall, and F1-score, which will give a better understanding of the results.

4. Can you give an analysis of misclassification of the songs, which is required in terms of error rate and accuracy.

5. Can you provide tabular and graphical representation of the results, which gives a clear understanding of the experiment performed.

6. Can you provide a comparative analysis of other classification algorithms that are recently published in the same area of research, which leads to a better understanding of the paper.
