**Potential competing interests:** No potential competing interests to declare.

The article has a good research question, and current issues regarding the work group have been discussed.

In the literature, it is suggested to add a theory that is related to this study.

Under methodology, there is no discussion of the research design, how the study eliminated bias, and how the sample size was calculated.

Under correlation analysis, there is an analysis regarding "How old are you?" How is this analysis being measured, since age is a nominal value?
