

Review of: "From Earth to Art: Repurposing Clay Residues into Ephemeral Clay Sculptures of Organic Art and Styles"

Roberto Galéry¹

¹ Universidade Federal de Minas Gerais

Potential competing interests: No potential competing interests to declare.

It is not a scientific paper and repeats the expression "repurposing clay residues into ephemeral ceramic sculptures" all over the entire text.

No data on the amount of clay residues that are disposed of as waste.

No physical and chemical characterization of the clay residues produced by ceramics and sculpture studios.
