This manuscript is quite comprehensive in terms of therapeutic insights of Solanum nigrum. The following comments could help to make this review much better for a wide readership.

1. The structure is not made with uniformity.
2. A paragraph on the phytoconstituents should be written for better understanding of chemical profiling and their relationship to biological activities.
3. What is the most abundant class of compounds in this plant? Mention in the conclusion.
4. What is the best activity shown by each part of this plant? Mention in the conclusion.
