Potential competing interests: No potential competing interests to declare.

In this manuscript, the author discussed the Phyto-Therapeutic Potential and Pharmaceutical Impact of Shilajit (*Asphaltum punjabianam*): Current Research and Future Prospects. The current manuscript, focusing on plants, natural products, and their pharmacological potential, serves as a valuable resource for researchers in related fields seeking further study. While the manuscript is generally well-organized, there are still some significant comments that could enhance its overall quality.

1. Chemical structures of the bioactive compounds are lacking.
2. Biosynthesis of chemical compounds is lacking.
3. Clinical studies data is lacking.
4. Mechanism of action of key bioactive compounds is lacking.
5. Toxicological part is lacking.
6. Isolation and processing strategies are lacking.
