The article "A Tracer Study on the Employment Status of Accounting and Finance Graduates from Furra College, Hawassa Campus, from 2009-2013 Ethiopian Calendars (E.C.)" is well written with good quality and is fit for publication, but before publishing, the writer may be suggested the following recommendations for the betterment of the health of the article, as follows:

- A. The research's approach used is not clearly defined. You used a mixed approach, but no detail is given about which method from both techniques is being used. Please define it with clarity and in detail.
- B. The population selected for this study is not appropriate; it must be widened. The response rate of the respondents looks like it was manipulated.
- C. The theoretical framework may be added for more clarity for the reader.
- D. The conclusion and discussion portion of the study is not up to the mark.
