Potential competing interests: No potential competing interests to declare.

Here are the key points presented in the feedback provided:

1. **Clarification of Terminology:** Some terms used in the article need to be either changed or further explained for better understanding.
2. **Explanation of Search Process:** More clarification is needed on how the search was narrowed down from 2500 articles to 11, including the keywords used for this selection.
3. **Articulation of Objective:** The objective of the article should be formulated more clearly to guide the reader through the content effectively.
4. **Inclusion of Definitions:** Definitions of resilience and mega-events should be included earlier in the article.
5. **Linking Urban Events and Planning:** The article should explore the synergies and trade-offs between urban mega-events and urban planning in more depth.
6. **Methodological Explanation:** The introduction of illustrative material, such as graphs and tables, should be better integrated into the text with explanations for their relevance and how they contribute to the narrative.
7. **Comprehensive Approach:** The article should address surprise and uncertainty in the context of resilience, and not solely focus on economic aspects, but also consider social and ecological dimensions for urban sustainability.
8. **Selection of Articles:** The process of selecting the 11 articles should be clarified, including the criteria used for their inclusion.
9. **Methodological Explanation:** Various approaches like dendrograms and sentiment analysis should be explained in the context of the research method.
10. **Focus on Comprehensive Resilience:** Urban resilience should be viewed holistically, beyond just economic aspects, to include social and ecological dimensions.
11. **Clarifying Correlation:** The connection between urban mega events and urban resilience in terms of correlation/causation needs to be better defined to avoid confusion.
12. **Lesson Drawing from Mega-Events:** Understanding how cities react to mega-events can provide insights on making them more resilient in the future by identifying shortcomings and learning from mistakes.
13. **Discussion on Urban Planning:** The article should focus on how urban planning can ensure the resilience of cities across various dimensions to enrich sustainability.

These points should help in reworking and organizing the article to enhance clarity and effectiveness in communicating the intended message.
