Potential competing interests: No potential competing interests to declare.

The theoretical review in the Introduction is notably brief. It is necessary to ascertain the rationale behind the research.

The problem to be solved is not sufficiently delineated. There is a need for further studies.

The methodology section is notably lacking in detail. It would be beneficial to understand the rationale behind the methodology employed, as well as the procedure for conducting the research.

In the research results section, the presentation of information should be in the form of figures, tables, or illustrations that enhance the understanding of the research results. Further theoretical studies are required to support the discussion.
