New Peer Review

Qeios ID: UWBEZB

This work describes the application of Docker and containerization for deploying a WordPress application. The authors can look into the following points to improve the quality of the article

1. Explain the theoretical background of the work.

2. Try to present a comprehensive literature survey related to this work.

3. The methodology of the work carried out needs to be clearly explained.

4. In the results section, present a comparative analysis of all the load balancing algorithms.

5. Justify why the solution is scalable and secure compared to the existing systems.
