

Review of: "[Mini Review] Cytobiological Alterations Induced by Celecoxib as an Anticancer Agent for Breast and Metastatic Breast Cancer"

Sunny Dhir

Potential competing interests: No potential competing interests to declare.

The MS talks about the alterations induced by anti-cancer agents. The review is exhaustive and describes implications that are important in the treatment of breast cancer.

The review requires language editing and a few corrected sentence formations. With minor revision, the review is acceptable thereafter.
