**Potential competing interests:** No potential competing interests to declare.

I was one of the examiners for the research dissertation on which this paper was based, and as such, I reviewed it in detail. A lovely piece of work. The lead author, in particular, is to be highly congratulated both on her research and this paper. Both were a real pleasure to read and potentially highly useful for the field. She has a gift for research, and I look forward to hopefully seeing more of her work in the future.
