Potential competing interests: No potential competing interests to declare.

The paper is well written.

Some points need to be addressed.

1. The article should include the background and the clear motivation behind the development of the proposed model.
2. There are many similar studies in the community. The review needs to be strengthened with comparative analysis.
3. In the methodology section, justify the feature selection process: which type of algorithms is used, which features are selected, and how it impacts the results.
