Potential competing interests: No potential competing interests to declare.

This review article is about long COVID syndrome.

In my opinion, this article is not a systematic review. The search was done on one database (PubMed electronic database), and only on systematic reviews and meta-analyses. And it's not based on the PRISMA guideline.

In the abstract, authors declare the search was done up to May 2023, but in the main text, it's mentioned until March 2024.
