

# Review of: "Effects of Cinnamon on Cancer Prevention and Progression"

Ramakrishna Ungarala<sup>1</sup>

<sup>1</sup> University of Pittsburgh Medical Center

**Potential competing interests:** No potential competing interests to declare.

The manuscript studies the effect of bioactive components from cinnamon on the control of cancer cell proliferation. The manuscript has numerous grammatical errors, difficult phrasings, and typos that undermine its readability and professionalism. The authors should thoroughly proofread the manuscript or consider seeking help from a professional editor to enhance its clarity and coherence. The authors could graphically represent the review to give a clear view of the aim of the article.
