Abstract

Line 11: 87.84±0.01- which is the unit of measurement

Line 13: whilst---→while?

Line 16: 2 times is µg/ml

Preparation of plant extracts:

Why not use a fixed amount of a substance to achieve a specific concentration?

Phytochemical analyses

of B....→ of B

therein→there in

3.1.

What method did you use to determine the presence of the active substance? Should be marked in the bibliography.

After qualitative determination, it is not possible to declare the presence of individual active substances in an article.

Table 2.:

What does it mean 200, 500, 800, etc., in the text you do not mention these values.....

Bibliography

At Masarirambi, you have data missing.

IN CONCLUSION

This article has only one experiment, which is very little to be published in a journal in an international database.
