

Review of: "Revolutionizing Precision Agriculture with Drone-Based Imaging and Fuzzy Intelligent Algorithms"

Priti Das

Potential competing interests: No potential competing interests to declare.

The topic seems quite interesting. However, there are some rectifications that need to be done before publication.

1. The introduction of the manuscript does not sync with the results and findings of the work.
2. Literature survey needs to be more elaborate and precise. Incorporate the latest research articles in this section.
3. The result section is quantitative, but it should be qualitative as well. Elaborate on the findings and describe them in this section.
4. Overall, there are many typos and grammatical errors. If possible, use a grammar checking software.
5. Include a section summary in the introduction section.
6. Update the references.
7. The flowcharts need to be more clear and descriptive.
