

# Review of: "A Study on Alternative Low-Emission Sustainable Soil Stabilization Techniques in General and Combat Military Operations"

Manish Shah

Potential competing interests: No potential competing interests to declare.

1. Inadequate analysis and representation of various available experimental methods and their application in military operations.
2. No literature supporting the above-mentioned points.
3. Few analyses shown are inadequate to serve the objective of this paper.
4. Low emission techniques or materials properties are not defined nor are supported by any international codes.
5. Paper can be resubmitted after major corrections.
