

# Review of: "Nanomaterials: History, Production, Properties, Applications, and Toxicities"

Punit Kumar

**Potential competing interests:** No potential competing interests to declare.

The article is well-written and comprises many valuable facts supported with references. Authors are suggested to organize the manuscript and avoid repetition of facts. The manuscript should be revised. Here are some comments for the manuscript.

1- The article comprises lots of information related to the history of development and uses of nanomaterials. It should be reduced. Authors are suggested to include more scientific information.

2- Authors mentioned the concept of nanomedicines and environmental pollution (Ref 22). Here, authors are suggested to elaborate on this concept.

3- In the section NPs and NMs, authors included history. It is suggested to include history in one section.

4- Authors are suggested to improve section 3, NMs and their applications.

5- Authors are suggested to include future prospects.

6- Authors are suggested to include recent references in the manuscript.
