

Review of: "Effects of Cinnamon on Cancer Prevention and Progression"

Canan Vejselova Sezer

Potential competing interests: No potential competing interests to declare.

The review article requires more detailed explanations of the effects of cinnamon, along with the experimental results of the novel research on the topic. General sentences need to be given in detail with the citations of recent studies on cinnamon in cancer treatment and prevention. Also, all of the subheadings require enrichment with recent study results on the paper review topic. I recommend a major revision of this manuscript. Sincerely yours...
