Thanks for your useful article. It seems that you forgot to put the meta-analysis results in the manuscript, since it is mentioned, "A systematic review and meta-analysis were conducted based on 51 studies (33,573 patients) examining the characteristics of Long COVID caused by different variants of SARS-CoV-2 six months after the initial infection."

Where are the results?

It is suggested to put the PRISMA checklist.

Included and excluded criteria are not mentioned at all.
