Some comments:

The author needs to clarify more specifically the aim of this review paper.

In the Etymology of Ethics section, I think the author can write about child ethics specifically more than ethics and morals in general.

If it is a global review, in my opinion, the author better not specify that it is a benefit to churches and Sunday holidays. Even in the origin of the word 'ethics' in the introduction, I think it should be mentioned that other religious morals and ethical sciences were built in different nations and religions.

The review, in general, needs to be more global in all its contexts. Otherwise, the title could be changed to a specific people and religion.
