Dear author

Thank you for your valuable work. It can make a great impact in this field.

My comments:

1- Please, follow PRISMA guidelines and supply the PRISMA checklist as supplementary material to your manuscript.

PRISMA checklist can be found at this link:

<https://www.prisma-statement.org/prisma-2020-checklist>

2- Please add a section on study design in which the design of your review can be provided.

3- Add strengths and limitations of your review at the end of the discussion section.

4- Revise the references list:

- References numbers 3, 7, 13, 15, 19, 21, 22, 25, 26, 29, 30, 31, 36, 38, 45, 52, 53, 57-60, 62, 66, 70 are not recent, so please replace them with more recent references, if available.
- Reference number 43 contains the year after the first author's name, so remove it.
- References numbers 52, 75 are of a different style than the other references.
- So please mention all authors in reference number 52 like other references and remove brackets from the years of references numbers 52, 75.
